● **Brushed Nickel**
NR252008BN

- 1x Pull Out Sink Spout
- 1x Hand Wheel
- 1x Base Ring
- 1x Counter Weight
- 1x Triangular Support
- 1x Hose Tail

*Dimensions are nominal measurements only.

Installation Instruction

GENERAL INSTRUCTIONS:

- This product must be installed by a licensed plumber. Ensure that your plumbing installation conforms to the Australian/New Zealand Standard AS/NZS 3500.
- All pipework must be thoroughly flushed prior to the installation of the mixer. In-line filters must be fitted on both hot and cold supplies to prevent foreign particles from damaging the ceramic cartridge.
- All outlets used primarily for personal hygiene must deliver water at a safe temperature in accordance with regional regulations.

NOTE:

- Do not hydrostatic test the installation with this mixer installed. Damage to the ceramic cartridge may occur.
- Do not remove the ceramic cartridge from the mixer when installing.
- After installation, all connections must be checked for leaks.
- This mixer is not recommended for use in uncontrolled heating systems such as wet-backs or solar heating units unless a suitable tempering valve is fitted.
- If limited water flow is experienced, locate aerator and filter washers and clean away foreign material as required.
- It is the responsibility of the plumber to ensure a waterproof seal is achieved between the product and mounting surface. If in doubt about the quality of the seal, remove the product and reinstall.
- Dual non-return valve prevents cross-feeding and backflow.
- The flexible hoses are fixed and cannot be replaced with other hoses.

1. Drill a 35mm (for spout) and a 40mm (for mixer) through-hole on the counter. (The counter thickness must between 20mm to 40mm). The recommended distance of the two holes is 200mm, reference to below diagram.
2. Remove all fitting parts on the thread pipe for both spout part and mixer part. Put on base ring for spout part, then put spout part and mixer part through the two holes.

3. Slide rubber washer, triangle plate and steel washer and lock nut onto spout part in a row according above diagram. Then slide rubber washer and nut onto mixer part .
4. Screw on extension spray hose, hot and cold flexible hoses onto mixer part according to below diagram.
5. Connect pull out hose to extension hose by quick joint.
6. Install counter weight onto pull out hose firmly. The recommended installation height of weight is 350mm from the counter bottom side, please reference to below diagram.

7. Turn the hand wheel counterclockwise to the end. Then reinstall the hand wheel, make the "C" should be on twelve o'clock direction and "H" on the six o'clock direction, according to above picture. Then tighten grub screw of hand wheel by allen key, put cap into hand wheel.

MAINTENANCE AND CARE:

- Regularly check the mixer and connections for signs of wear or leaks.
- Clean the tap with mild soapy water to maintain its appearance, avoiding harsh chemicals and abrasive materials that may damage the finish.

FINAL INSPECTION:

- Ensure the tap operates smoothly and that there are no leaks at the connections.
- Clean the area and the newly installed tap with a soft cloth to remove any installation residues.
